

# 1

Listen to this piece of music played on a flute:

[Flute Music](#)

Then have a listen to this piece of music, played on bottles:

[Bottle Music](#)

The way of playing bottles is very similar to the way of playing a flute!

The different notes are made by filling the bottles with different amounts of water.

# 2

- Can you find a bottle, any sort will do, and blow across the top to make a sound?
- Can you find several bottles (they do not all have to be the same) and fill them with different amounts of water to make different notes? (Like in the video above).
- Can you make a tune?

# 3

Learn to sing the song of the week from Sing Up.
